

Data Management System

Collect, distribute data, and connect systems flawlessly.

The quality of your products, efficiency of production, and success of your business all depend on continuous optimization and automation of your production process. Charm CONNECT is a Microsoft Windows-based software solution that is installed locally, in a networked multi-plant environment, or as a cloud-based solution.

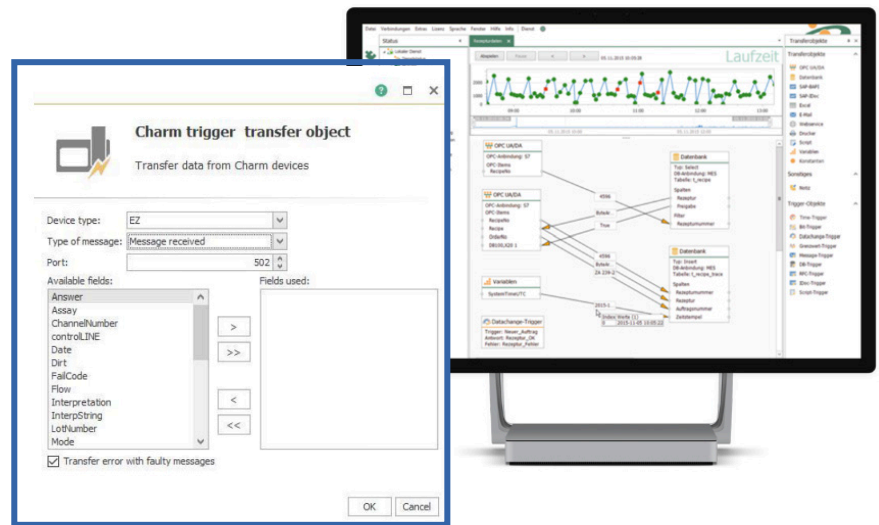

Example of How Charm CONNECT Works

Charm connects real-time data with real-life results

Endless Possibilities

- **Device Management/Heartbeat** – instantaneous feedback on the status of remotely connected devices and automated rebooting, when necessary
- **Programmable Logic Controller (PLC) compatibility** – open source code software allows for programming to lock pumps, valves, gates, and more
- **Email/Text/SMS Notification** – email/text results for automated alerts to key management
- **Customizable** – choose which data attributes to save to database and report
- **Integrate Automated Sample Identification** – supports barcode, RFID, and QR Code
- **Database Integration** – individual local or networked server, or cloud database installation integrates seamlessly with SQL/SQL Express DB, LIMS, MES, ERP/SAP systems
